BARNABAS - Approaching Light Speed (NEW*LIM.US WHITE METAL*VIXEN*DIO*RUSH*KANSAS) - 15 €

Retroactive Records 2017 – US Direct Import ! Brandnew + Limited Rerelease of this US WHITE METAL Classic !

Full color 12 page booklet insert with lyrics and band pics - Part of the Legends Remastered series on Retroactive Records!

In honor of 40 amazing years of Barnabas, this Retroactive Records reissue is packaged in a jewel case featuring a 12 page full color booklet with lyrics and band pictures, and writes-ups from both the label owner, Matthew Hunt, and Doug Peterson of Down The Line Zine.

For fans of Rush, Dio, Resurrection Band, Vixen, Daniel Band, and Kansas (if they were metal!).

With the 1983 album Approaching Light Speed, Barnabas released what many still consider to be one of the very best albums in Christian progressive metal. With this release the band pulled everything together and upped the "Wow-Factor" to a new level. With the raging guitars of "No Freedom" launching the album to new heights, the album continued to progress and show artistic growth and maturity in astounding ways. Combine that with cutting-edge lyrics, spacey keyboards interlaced throughout, and textured guitars building to new sonic extremes, and metalheads everywhere were hooked. The recording and the mix of the album also went to new levels, allowing the depth of the music and songs to shine. Each instrument can be heard perfectly, and Nancy Jo's vocals penetrate the soul. Did we mention the guitars? They are LOUD! They are METAL. And, from this point on, they would define the Barnabas sound.

Any band is lucky to make one album that is truly elite. When I say "elite," I don't just mean great songs and great execution. What I mean by "elite" is that this album is something that strikes a chord deep within the souls of many people... that steals the hearts of fans in sweeping

fashion... that adds up to much, much more than the sum of it's parts... something that is truly transcendent. With Approaching Light Speed, Barnabas nailed it. They nailed it with an album that is just as musically, lyrically, and spiritually transcendent in 2017 as it was in 1983. And, let's get one thing clear: there was NOTHING like this album in Christian music in 1983! The good news at the time was that fans were ready. They were ready for something quality, something authentic, something real. And, with this release Barnabas did what they did on every single album – they wore their hearts of love for God and people on their sleeves. Their new record label, Light Records, encouraged the band to “tone it down a little bit.” Thank God Barnabas chose to be more radical than ever. Their courage and conviction would go on to help them achieve critical acclaim and widespread popularity amongst a growing population of people who needed exactly what they were offering. Approaching Light Speed has been digitally remastered by Bombworks Sound (Rob Colwell) and we are confident the album has never sounded better than now!

BARNABAS - Hear the Light (NEW*LIM.US WHITE METAL*VIXEN*DANIEL BAND*KANSAS) - 15 €

Retroactive Records 2017 - US Direct Import ! Brandnew + Limited Rerelease of this US WHITE METAL Classic !

This treasured classic is packaged in a jewel case with a 12 page booklet insert featuring write ups, band history, band pictures, and lyrics that make sure the album has never looked better! Must-have for fans of Agape, Resurrection Band, Daniel Band, Motorhead, and Jerusalem! When Barnabas embarked on their musical journey with the now critically acclaimed debut release, Hear the Light (1980), there were few bands doing anything like them in the faith community. There was Resurrection Band in Chicago, Bill Mason Band and Ishmael United in the UK, and Andy McCarroll & Moral Support in Ireland. When Hear The Light came out in 1980, it was truly unique punk-esque with a Christian identity. Barnabas, in their early formation, had guitarist Monte Cooley, who could write fast numbers with infectious distortion like no other. What placed Barnabas on top of the rock pile were Nancy Jo Mann's soaring vocals, backed by a beefy and intricate rhythm section. Songs such as Savior, Directory Assistance, B.C., and Playin' For Him are reckless and melodic, trademarks of the first album. Hear the Light started it all for a band that would go on to have an immeasurable impact on Christian rock and metal. In honor of the 40th Anniversary of Barnabas, all five albums will be/have been reissued by Retroactive Records in 2017! The 2017 reissue features a complete remaster by Rob Colwell of Bombworks sound guaranteeing the album has never sounded better.

BARNABAS - Find your Heart a Home (NEW*LIM.US WHITE METAL*VIXEN*DANIEL BAND*JERUSALEM) - 15 €

Retroactive Records 2017 - US Direct Import ! Brandnew + Limited Rerelease of this US WHITE METAL Classic !

This treasured classic is packaged in a jewel case with a 12 page booklet insert featuring write ups, band history, band pictures, and lyrics that make sure the album has never looked better!

Must-have for fans of Agape, Resurrection Band, Daniel Band, Motorhead, DIO, Vixen, Rush, Kansas and Jerusalem!

On Find Your Heart A Home, the remastered sound gives the album a second wind. The guitars and bass get their due place in the recording. This second album finds Barnabas losing Monte Cooley and gaining two guitarists, Mick Donner and Kris Brauminger, who play quite proficiently. Keyboards became a staple element due to bassist Mann's love for full arrangements. Find Your Heart A Home has a myriad of rock variation, from the hard rollicking to the blues-infused and even a bit of funkiness.

Swordsman and Way Of Destruction are a couple progressive rockers that still sound stellar even after repeated listening. The album ends off with the memorable Southern Woman, reminiscent of Jefferson Starship at their finest. A solid album; consistent yet diversified.

In honor of the 40th Anniversary of Barnabas, all albums will be/have been reissued by Retroactive Records in 2017! The 2017 reissue features a complete remaster by Rob Colwell of Bombworks sound guaranteeing the album has never sounded better.

DELIVERANCE - Weapons of our Warfare (NEW*LIM.500*US SPEED METAL*BELIEVER*EXODUS) - 14 €

Bombworks Records 2017 - US Speed Metal Classic - Lim. 500 Remastered Edition ! For Fans of Believer, Slayer, Exodus, Metallica, Tourniquet, and Anthrax.

Only a year after the band released the historic Self-Titled debut, the band released their 1990 tour de force: Weapons of Our Warfare. Metallica created Master of Puppets, Slayer bludgeoned the world with the classic Reign In Blood, Flotsam & Jetsam had Doomsday..., and Exodus boasted Bonded By Blood - all albums that would create the standard for all other speed metal releases. Weapons of Our Warfare was that album for Deliverance. It cemented the band's place as iconic speed metal royalty. To this very day, Weapons is still mentioned with hushed reverence among Christian metalheads as one of the elite speed metal albums of all time.

Guitarist Glenn Rogers had exited the band and former Recon guitarist George Ochoa had joined in his place. Weapons of our Warfare turned out to be one monster of a record, a genuine speed metal classic. Each and every song is played with a feverish fury, and once again the song writing is outstanding. Since 1985, lead vocalist and rhythm guitarist, Jimmy Brown had been crafting some of the tastiest techniques for complex rhythms and highly technical rhythm guitar. Brown's guitar mastery drives the album from start to finish, setting new standards of power, precision, and stamina. The album shows marked musical growth with several adrenaline-driven, extended, multi-sectioned compositions foreshadowing the band's later progressive epics. And the trade-off guitar leads by Brown and Ochoa provide first rate riffage that will satisfy even the most skilled Guitar Hero addict.

A video version of the title track became the first Christian metal song to gain airplay on MTV, and it placed among the top three on that network's Headbanger's Ball countdown for twelve weeks in a row! In 1999, Lars Ulrich (Metallica) hosted a show in which he named Deliverance "Weapons..." as one of his top ten favorite metal videos of all time.

Weapons of Our Warfare (The Originals: Remastered) takes all the magic from the original release and magnifies it! Featuring a complete 2017 Digital Remastering, J Powell at Steinhaus worked hard to make it sound substantially better than the original, while still keeping the character of it. The original artwork is expanded to a 12 panel booklet (many Weapons era photos and lyrics!) and packaged in a jewel case to make sure this reissue delights all Mighty "D" fans, as well as fans of Believer, Slayer, Exodus, Metallica, Tourniquet, and Anthrax.

DRACENA - Cursed To The Night (NEW*SWE HEAVY/BLACK METAL*FEMALE FRONTED) - 12 €

Inferno Records 2017 - Brandnew Femal fronted Black +Heavy Metal shrapnel !

DRACENA's music is best described as a mix of Heavy & Black Metal - recommended for fans of Bathory, Mercyful Fate, Dissection, Venom, Running Wild, Iron Maiden

Dracena was spawned in Gothenburg (SWE) during a stormy autumn night in 1994 to be an all female metal band, later dubbed as "Sweden's heaviest all-girl band" in the Encyclopedia of Swedish Hard Rock and Heavy Metal.

By creating a mix of various metal genres, ranging from old school classic metal to the power of thrash with a touch of black metal and brought forth by the lyrics of a sinister dark atmosphere of bloodlust and death, Dracena has been described as a cross between Bathory and Mercyful Fate/Venom and Running Wild.

EMERALD - Voice for the Silent (NEW*COMEBACK*DUTCH METAL*A.WITCH*SATAN*C.GLORY) - 13 €

Metal on Metal Records 2017 - Brandnew Comeback Album - Dutch Metal / Heavy metal with lots of melody and NWOBHM influences!

The Dutch heavy metal scene of the '80s has given birth to many jewels, and one of them was "Down Town", a debut LP of EMERALD.

It was the only album of the band until now, when their long awaited comeback finally sees the light of day. A 32-year gap between the albums is huge... Many bands fail to revive their spirit, but EMERALD fans have nothing to fear: the record sounds as if it was a "lost" gem from the

'80s! The songwriting hasn't changed (actually many of these songs were written soon after the debut was out), and Bert Kivits' vocals still have this incredible youthful energy and feel, though now they're smoother, not as extremely high-pitched and shrill as back in the day. The production is also totally old school - the fully analogue recording, engineering and mastering resulted in great warm sound, which will be for sure appreciated by the fans. And if you're not one of them yet, but love old heavy metal with a great dose of melody and clear NWOBHM influences, you will likely become one and put their new album next to classic records For Fans of ANGEL WITCH, SATAN, BLITZKRIEG, RIOT, JUDAS PRIEST, CLOVEN HOOF, DIAMOND HEAD, PICTURE, UFO, THIN LIZZY, and CRIMSON GLORY.

FATAL OPERA - The Eleventh Hour DCD (NEW*LIM. US PROG/POWER METAL*P. WALTZ*MEGADETH) - 20 €

Divebomb Records 2017 – Brandnew US Tech/Prog/Power Metal - Limited DCD incl. Bonus Tracks

FOR FANS OF: DAMN THE MACHINE, PSYCHOTIC WALTZ, MIND OVER FOUR, KINETIC DISSENT

After parting ways with thrash titans Megadeth in 1987, highly regarded percussion maestro Gar Samuelson began his next chapter. Relocating to Orange City, FL, Gar rented a farm and began converting its barn into a studio with the help of his brother, guitarist Stew Samuelson. Largely influenced by jazz fusion and carrying the primary goal of simply achieving a heavy sound, FATAL OPERA was later solidified with bassist Travis Karcher, Dave Inman on vocals, and second guitarist Bill Brehme.

The group's sophomore effort, The Eleventh Hour, began to take shape in 1994 with a 13-song pre-production demo. In 1995, however, vocalist Dave Inman amicably bowed out, resulting in the addition of enthusiastic new frontman Andy Freeman. Writing continued, and FATAL OPERA entered the studio in the spring/early summer of 1996. If their debut had offered an adventurous and truly incomparable brand of technical thrash metal, The Eleventh Hour—released in 1997 (once more via Massacre Records)—found the band simply bursting with energy—more melodic, more progressive, more of everything: sure to appease fans of other one-of-a-kind acts such as Psychotic Waltz or Damn the Machine.

Now, two decades later, Divebomb Records is excited to reissue FATAL OPERA's The Eleventh Hour—expanded to include a Japanese bonus track as well as an entire bonus disc freshly remixed by the band. Fully remastered by Jamie King at The Basement Recording, the package will also boast a 20-page booklet including all-new cover art by Steven Cobb, photographs, lyrics, and a retrospective interview with the bulk of the surviving band members.

FATAL OPERA - Same (NEW*LIM.ED.*US TECH/THRASH METAL*MEGADETH*P.WALTZ) - 15 €

Divebomb Records 2017 – Brandnew US Tech/Prog/Power Metal - Limited ED incl. Bonus Tracks

For Fans of DAMN THE MACHINE, PSYCHOTIC WALTZ, MIND OVER FOUR, KINETIC DISSENT

After parting ways with thrash titans Megadeth in 1987, highly regarded percussion maestro Gar Samuelson began his next chapter. Relocating to Orange City, FL, Gar rented a farm and began converting its barn into a studio with the help of his brother, guitarist Stew Samuelson. Largely influenced by jazz fusion and carrying the primary goal of simply achieving a heavy sound, FATAL OPERA was later solidified in 1990 with bassist Travis Karcher, Dave Inman on vocals, and short-term guitarist Jeff Bloom—who left the band the following year after contributing to a 10-song demo that was not widely circulated.

Over the next two years, the remaining quartet wrote and recorded the group's 10-song self-titled debut, after which they were joined by another fusion-influenced guitarist in Bill Brehme. Initially self-released on cassette, FATAL OPERA signed with German label Massacre Records in 1994, which finally provided the album with a proper CD release in 1995. Cited by Gar as having been an "outward" effort—lyrically focused on socio-political matters, etc.—Fatal Opera displayed an adventurous and truly incomparable brand of technical thrash metal, peppered with melodic hooks and wild, jazz-inflected soloing.

Now, more than 20 years later, Divebomb Records is excited to reissue FATAL OPERA's debut outing—expanded to include two previously unreleased bonus tracks. Fully remastered by Jamie King at The Basement Recording, the package will also boast a 20-page booklet including reimagined cover art by Steven Cobb, photographs, lyrics, and a retrospective interview with the bulk of the surviving band members.

FORMICIDE - Demo-logy 1987-1989 (A Tribute to Eric Stevenson*US 80's THRASH METAL CLASSIC) - 15 €

GUARDIAN – Fire + Love (NEW*LIM.ED. + BONUS TR.*US WHITE MELODIC METAL*STRYPER) - 14 €

Retroactive Records 2017 - Limited Edition 6 panel insert with lyrics / jewel case / one bonus track

Fire & Love should come packaged with a rubber mat to prevent your jaw from shattering when it drops to the floor. Response to the album release (1990) was overwhelming, and the video for the song "Power of Love" was included in the MTV's Headbangers Ball rotation. The shredding melodic metal of their previous album is replaced by red-hot, fired-up commercial hard rock that is belted out with emotive power to spare by the awesome Jamie Rowe.

Adding to the album's appeal is the legendary production talents of John & Dino Elefante (Kansas/Mastedon)! If you love big guitars (Palacios rips!), big hooks (Motley Crue would be jealous), big choruses (Bon Jovi would approve), big vocals (can you say wall of sound?), and big production (it's the Elefantés...what else do you need to know?), then you'll love this album, a true Christian hard rock classic.

Fire & Love earned Guardian a well deserved place at the top of the Christian hard rock/hair metal scene, nudging Stryper slightly over to share a bit of the spotlight. At #28 on Top 100 Christian Metal Albums of All Time (2010, HM Magazine), #61 Top 100 Christian Rock Albums of All Time (2010, HM Magazine), #18 on the Christian Metal Realm's 100 Greatest Christian Metal Albums of all time, and #11 Top Albums of the 90's by Angelic Warlord Reviews, Fire & Love offers elite Christian metal that still knows how to win the hearts, and touch the lives of fans across the world! Fire & Love has been digitally remastered for this 2017 reissue, further enhancing the pure magic that has been thrilling fans since its release in 1990!

Excerpts is simultaneously warm in its production yet cool in execution, swaggering through its 43-minute duration with Uriah Heep's jauntiness and lively playfulness. HARD ACTION - Hot Wired Beat (NEW*FANTASTIC HARD ROCK*#1 ROCK HARD*HELLACOPTERS*T.LIZZY) - 14 €

Svart Records 2017 - Brandnew fantastic Hard Rock (2nd Album) with killer guitar Work, fine melodies and the Rawness of Rock'n'Roll/Punk ! #1 in Rock Hard Soundcheck ! 9 from 10 points !

For Fans of Thin Lizzy, Black Trip, Imperial State Electric, Horisont, Spider, Deadheads, Gluecifer, The Hellcopters Hard Action's debut album Sinister Vibes (2015) was an unexpected underground success with its buzzsaw-guitar caveman brand of action rock, taking the band to several tours across Europe. The second album Hot Wired Beat is set for release on Svart Records on December 1st.

The Hard Action of today is a slightly older, more street-smart, tighter bunch of hairy youngsters. Hot Wired Beat boils with the hot blood of youth but its better musicianship and production values give room for certain more traditional aspects of rock music such as melody and hooks. Tradition is the key here in other respects too; at times the record channels the spirit of the early 70's Rolling Stones, at others it sounds not unlike something Hanoi Rocks could've recorded early on.

On Hot Wired Beat Hard Action succeed in being both youthfully reckless and smooth, like scenes of violent street fights set to classic Fleetwood Mac albums. Expect to see them live at an underground joint near you in 2018.

With the roster rounded out by Helena Kihlstrand (Sabrina's sister) and Tina Strömberg, Ice Age were more power metal oriented in the early stages. Originally named Rock Solid, they changed to Ice Age after the first demo. As the Ice Age sound became rawer, they moved into playing very technical thrash. Touring several countries and playing many festivals, these Swedish ladies gradually gained more and more popularity. By 1990 Ice Age had recorded four demos. Rock Solid (1986), General Alert (1987), Untitled (1988), and Instant Justice (1989).

ILIUM - Sirens of the Styx "Re-styxed" DCD (NEW*AUS POWER METAL MASTERPIECE*RERECORDED) - 17 €

Nightmare Records 2017 - Brandnew Limited DCD - Rerelease + Rerecorded AUS Metal Masterpiece with Lord Tim (Dungeon/Lord) on Vocals ! 3-panel Digipak DCD Australian melodic heavy/power metal band ILIUM reissues their debut album as a double CD featuring both their bombastic completely re-written and re-recorded version with additional bonus track and new cover art with the original in one package - this very special reissue hosts the return of (Lord / Dungeon) vocalist Lord Tim, who previously sang on the bands "Permian Dusk" and "Vespertilion" albums.

With Ilium's 2017 release 'Sirens Of The Styx: Re-Styxed', the band has come full circle. In 2003 Ilium released their debut album 'Sirens Of The Styx' with vocalist Mark Snedden and producer Lord Tim (Lord, ex-Dungeon, and who went on to sing lead on the next two Ilium releases) - an epic debut with music by twin guitarists Adam Smith and Jason Hodges.

Now, six albums later, the band has revisited this classic with a fresh approach. To celebrate the re-release of the debut, the group's driving forces Smith and Hodges have invited Lord Tim back to the microphone for a completely re-written and re-recorded version, featuring the brand new track 'Ode Of The Trans-Dimensional Puppeteer' as well as re-worked classics such as 'Antigone', 'The Celestial Sphere', 'Incipience: Beowulf Defeats Grendel', 'Half-Life' and the epic title track.

'Sirens Of The Styx: Re-Styxed' is the result of a band that has embraced the most dramatic elements of power metal legends such as Helloween, Blind Guardian and Gamma Ray, combined with the classic metal bombast of Black Sabbath, Judas Priest, Iron Maiden and Scorpions, and with a few technical thrash and progressive elements thrown in to their epic mix to produce a unique yet familiar sound.

LUNAR - Theogony (NEW*US PROG ROCK/METAL*HAKEN*AYREON*OPETH) - 14 €

Divebomb Records 2017 - US Prog Rock/Metal - FOR FANS OF: OPETH, HAKEN, PORCUPINE TREE, AYREON Based out of Sacramento, CA, LUNAR is a progressive rock/metal band formed in 2013 when longtime friends Alex Bosson (drums/percussion) and Ryan Erwin (guitar/vocals) decided to get together and write the style of music that was always in their hearts: genre-defiant and free of restrictive influence. After securing Danny Stevenson on keyboards, the search continued for a full lineup... but to no avail. Rather than delay their progress, the trio decided to record and release their debut EP, Provenance, during the winter of 2014.

Shortly after the release of Provenance, Danny parted ways with the group, while Bosson and Erwin began work on LUNAR's debut full-length, Theogony—a concept album based on The Nine Muses of Greek mythology. While reading about Melpomene, the Greek Muse of tragedy, Alex realized that the concepts that these Nine Muses represent—subjects such as history, tragedy, music, love, etc.—are the backbone for most creative output in this world. In keeping with the progressive element of the band, he had the idea to spread the musical and lyrical diversity of these themes across an entire album: each of the nine tracks named after one of the Muses, the music and lyrics based around the theme that each specific Muse represents.

Once more unable to flesh out a suitably complete lineup as writing progressed, Alex and Ryan decided to enlist contributions from other professional musicians around the world—initially a handful of guests laying down additional guitar solos. With the eventual additions of Ryan Price on bass and Chandler Mogel on vocals, a proper lineup for Theogony was set; and by the end of the recording process 17 different musicians had participated—including members of Hatriot, Angel Vivaldi, Helion Prime, Berried Alive, and many more.

MILLENIUM - Hourglass: The Complete Sessions (NEW*LIM.US HARD ROCK/MELODIC METAL*MASTERPLAN*RAINBOW) - 14 €

Divebomb Records 2017 - Fantastic Limited Rerelease of an US Hard Rock / Melodic Metal Classic incl. 6 Bonus Tracks with Jorn Lande (Masterplan) + Ralph Santolla (Iced Earth)

FOR FANS OF: JORN, RAINBOW, WHITESNAKE, MASTERPLAN & EYEWITNESS

From the late-'90s to the mid-2000s, highly respected workhorse guitarist Ralph Santolla (Iced Earth, Deicide, Obituary, etc.) was the driving force behind four tremendous hard rock albums from his own band, MILLENIUM. Originally released in 2000 by Now & Then/Frontiers Records, the group's third and arguably most ambitious effort—the progressive, metal-tinged, epic rock of Hourglass—was its only to include the wildly impressive talents of Norwegian frontman Jørn Lande (Jorn, Vagabond, Masterplan, etc.); not to mention keyboard contributions from Dag Stokke (TNT, Vagabond, etc.) and the legendary Don Airey (Rainbow, Ozzy Osbourne, Deep Purple, etc.).

Largely due to the spark of musical chemistry between Santolla and Lande—who instantly bonded over a shared love of similar music—Hourglass was the result of more collaborative writing sessions for the group. Recorded over the course of three months at studios as spread out as Manchester, England; Bøverbru, Norway (Studio Studio Nyhagen); Tampa, FL (Morrisound Recording); as well as the band members' own homes; MILLENIUM additionally laid down several cover tunes by the likes of MSG, Rainbow, Sweet, and Jefferson Starship—only released as Japanese bonus tracks or years later amidst The Best of... and More collection.

Predominantly well-received in Europe and Asia, limited shows supporting the release of Hourglass followed locally in MILLENIUM's home base of Florida; at the Gods of AOR festival in Wigan, England; and throughout a three-show tour of Spain with Ten and Elyte. At a certain point, however, Jørn—increasingly busy with other projects—amicably parted ways with the group, leading to the eventual return of their former vocalist, Todd Plant, and drawing this portion of the MILLENIUM timeline to a close.

17 years later, Divebomb Records is honored to bring this stunning segment of the MILLENIUM discography back to the fore with Hourglass: The Complete Sessions. This 16-track collection finds the 10-song album and six bonus cuts from the era compiled onto a single 76-minute CD for the first time. All of which is housed alongside an extensive 20-page booklet featuring updated cover art, photographs, lyrics, and a memory-fueled interview with Ralph Santolla, conducted by Shawn Pelata (Final Sign, Oracle)

PICTURE - Every Story Needs Another Picture + Marathon (NEW*DUTCH METAL CLASSIC 1986/87) - 18 €

Divebomb Records 2017 - Brandnew Rerelease of these Dutch Metal Classics from 1986/1987 - both albums on 1 CD (Pictures 6th and 7th Album) FOR FANS OF: VANDENBERG, HELLOISE, VENGEANCE & BODINE Widely recognized as one of (if not the) first Dutch heavy metal bands, PICTURE's storied career dates all the way back to 1979. Their classic first four albums were previously subject to Divebomb's two-on-one CD treatment in 2013, with fifth opus Traitor joining the ranks in 2016 for the first time ever on disc. But the picture—pun intended—remains incomplete...If Traitor had signaled PICTURE's shift toward a slightly more commercial hard rock direction in 1985, the transformation was complete with Every Story Needs Another Picture (1986) and Marathon (1987). The previous lineup having crumbled under record label pressures and musical differences, rhythm section Rinus Vreugdenhill (bass) and Jacques van Oevelen (drums, R.I.P.) soldiered on with new members Rob van Enkhuizen (guitar) and former VANDENBERG vocalist Bert Heerink—adding keyboardist Ronald de Grauw for Marathon. This mainstream-leaning and increasingly keyboard-centric sound may have alienated some fans, but the group's knack for hook-laden songwriting and memorable choruses certainly took center stage.

Now, 30 years later, Divebomb Records is proud to present yet another two-on-one CD reissue including both Every Story Needs Another Picture and Marathon—newly remastered by Jamie King at The Basement Recording, and bolstered by band-supplied archival materials. This finally completes the label's monumental undertaking to re-release all seven of PICTURE's pre-reunion albums over the course of the past four years.

PURPLE HILL WITCH - Celestial Cemetary (NEW*DOOM METAL*COUNT RAVEN*ORCHID*WITCHCRAFT) - 14 €

The Church within Records 2017 - Fantastic 2nd Album by PURPLE HILL WITCH from Norway !

A must have for all Fans of Orchid, old Black Sabbath with Ozzy, Witchcraft, Saint Vitus, Witchfinder General and Count Raven

With their sophomore album Celestial Cemetery out on Church Within Records, Norwegian Purple Hill Witch hits a sweet spot in the metal triangle between Angel Witch, Black Sabbath and Hawkwind. It's that alchemistic moment where psych, doom, NWOBH, proto metal and rock is molded and sculpted into a perfect entity. Whereas their debut album had more of a stoner rock vibe to it, the new album takes the listener on a sheer proto doom journey past vast galaxies of swirling, lommic riffs, blistering soli, driving drums and a steady surge of pulsating bass. What really strikes through on Celestial Cemetery is how much atmosphere and true feeling the band manages to cramp into the furrows of their sonic landscape – this album oozes with hallucinogenic visions of occult rituals and barren medieval country sides haunted by wicked witches. As such it leaves an even darker, more sinister imprint, and if there ever was an immaculate soundtrack for when going witch hunting across celestial cemeteries this would have to be it. Grab the magic wand and a copy of Purple Hill Witch's new album before the next hunt, you will need it.

Cult Metal Classic Records 2017 - Limited to 500 copies. SCRATCH from Sweden, made quite an impact back in 1985 with their only official release, the legendary "Metalbreaker / Before the Rain" 7" single.

With the passing of the years, the single became extremely rare and often misled for a NWOBHM release, making it almost impossible to find. After years of searching for the original members, we managed to locate the singer of the band Nic O'Noon who helped us put together a great compilation featuring the 2 classic songs of the single, plus 3 more songs, previously unreleased.

This is the CD edition, which features remastered sound and all the songs transferred at the highest quality from the original master tapes. Comes with story of the band, lyrics to all songs, great 80's photos and you should expect nothing less than the known high quality of Cult Metal Classics. One of the most anticipated reissues of 2017. Swedish metal rules!

TRIDENT - Power Of The Trident 2CD (NEW*LIM.500 NWOBHM CLASSIC ANTHOLOGY +BONUS TR.) - 17 €

Cult Metal Classic Records 2017 - Limited to 500 copies. Formed in North Wales in 1980, TRIDENT started as a trio by John Owen (guitars/vocals), Dave Alexander (bass) and John Pritchard (drums). They released one of the most sought after and highly acclaimed British 7" singles entitled "Destiny / Power of the Trident" back in 1983. TRIDENT easily ranks among the most proud moments for our record label so far. Thanks to the band founder John Owen, we were given access to master tapes of 18 songs in total, most of which see the light of day on vinyl and CD for the first time officially. Not to be confused with another band by the same name from Glasgow, these great musicians delivered fantastic hard rock / heavy metal compositions that had it all to get the band to the top.

TRIDENT ended in 1985 and John Owen formed FILTHY RICH, a great melodic hard rock / metal trio that also released a great single entitled "She's 17 / Love Ain't A Fool".

This is the Double CD edition, which features all songs ever recorded by TRIDENT and FILTHY RICH, including both singles, the TRIDENT "Flint Demo", the "Broken Dream" cassette album and additional unreleased tracks, with

powerful remastered sound. Comes with great fantasy artwork, 80's photos, band story and lyrics to all songs. This is definitely one of the most expected NWOBHM reissues of 2017! Limited to 500 copies.

TYFON'S DOOM - Emperor's Path (NEW*FIN NWOBHM*IRON MAIDEN*DARK FOREST) - 13 €

Gates Of Hell Records 2017 - Brandnew 2nd Album from Finlands NWOBHM influenced Warrior Varsala, now with Ced Forsberg (Blazon Stone) on drums !

For Fans of Iron Maiden, Mercyful Fate, Dark Forest, Satan's Fall, Angel Sword Too often, classic or traditional metal bands get caught in the vacuum of relying too much on the past. Not Tyfon's Doom sole member, Tommi Varsala. Varsala's innate ability to create classic, but timely metal rung true throughout "Yeth Hound", but it's even more prominent on the band's first full-length, "Emperor's Path". The album's 11 songs brim with confidence, not to forget a production job that puts "Yeth Hound" to shame. It's classic metal for the modern age.

Recorded from autumn 2016 to February 2017 primarily in Tampere, Finland in Varsala's own rehearsal studio, "Emperor's Path" marks the first Tyfon's Doom release to feature drummer Cederick Forsberg (Blazon Stone, Rocka Rollas, Cloven Altar) who laid down his parts at Studio 2-takt in Sweden. This allowed Varsala to focus on what he does best, namely, melodic, surging numbers, stocked with flighty twin-guitar harmonies and his throaty rasp, best described as the denim-wearing cross between MOTÖRHEAD legend Lemmy Kilmister and Destruction's Schmier. While songs like album opener "Tyrant's Sceptre" and "Beyond Treason" are molten slabs of pure metal, the brilliant stacked melodies that kick off "The Hidden Hand" and ride throughout "Moonlight" showcase an outfit capable of combining the never-say-die melodies of NWOBHM with the bright melodicism of the band's Finnish homeland.

VISITOR - Visitor (NEW*US SPEED/THRASH METAL CLASSIC 1993 + BONUS*HEATHEN*REALM) - 15 €

Divebomb Records 2017 - Brandnew Rerelease of this US Speed/Thrash Metal Classic from 1993 + Bonus Track !

FOR FANS OF: HEATHEN, SANCTUARY, KINETIC DISSENT & REALM VISITÖR formed in the Orange County area of California in 1989 and honed their chops for several years before recording two three-song demos in 1992 and 1993. With the lineup of Kurt Schultz (vocals), Joey Brown and Rob Skyler (guitars), E.K. Wright (bass), and Tony Stanley (drums), the group then entered For the Record recording studio in Orange, CA to track their 10-song debut album with engineer Eric Garten (Mind Over Four, Armed Forces, etc.).

Self-released on CD in 1993, Visitör put forth a high-quality form of the meaty yet melodic thrash that had been gaining momentum at that time, with a vocal range that allowed the material to branch out toward a more adventurous range of diversity that should appeal to fans of bands such as Heathen, Sanctuary and Realm. Promoting the release, VISITÖR shared the stage with Testament, Savatage, Lizzy Borden, and others; and two of the album's tracks appeared on a compilation of Orange County-based hardcore and metal bands called Orange Crunch, released by Lethal Records. Long out-of-print, original copies of the album have sold for \$200 or more, and VISITÖR released a one-time repress of the disc in 2010 to combat its rampant bootlegging. So now, nearly 25 years later, Divebomb Records is proud to present Visitör in its ultimate form—including an unreleased bonus track from 2010 called "Masters of Nations." Fully remastered by Jamie King at The Basement Recording, the booklet will include original cover art, archival photographs, and complete lyrics.

TYRANT - Too Late to Pray (NEW*US METALCLASSIC *LIM.30th ANNIV.ED.*5 BONUS TR.) - 14 €

Blood and Iron Records 2017 - Brandnew Rerelease of this US Metal Classic !

California's TYRANT were formed in the late 70s, but their first demos came in 82. The band signed to Metal Blade in 83 and in 85 their debut album "Legions of the Dead" assaulted the most dedicated metalheads ears in North America, then spreading all over the globe, earning a solid fanbase in Europe. After 2 years of successful sales and live shows with other popular bands such as Slayer, Agent Steel, etc., the band records the follow-up album "Too Late to Pray" with more evident Doom influences contrasting with their prototype Power/Thrash sound they shaped in their debut album "Legions of the Dead".

For a long time that this album was not released on CD in Europe, so Blood & Iron decided to work directly with founder and Bass Player Greg May to deliver an expanded edition with rare bonus tracks taken from their first studio demo (recorded October 13th, 1982) and second studio recording in 1983, delivering the first version of "Battle of Armageddon" available originally on the world famous Metal Massacre compilation LP (volume III).

The graphic content was also carefully put together through 24 pages, with many rare photos, memorabilia pics and an extensive biography written by Greg himself with all the information that fans want to know.

TYRANT - Legions of the Dead (NEW*US METAL CLASSIC *LIM.ED. + 7 BONUS TR.)

Blood and Iron Records 2017 - Brandnew Rerelease of this US Metal Classic !

California's TYRANT were formed in the late 70s, but their first demos came in 82. The band signed to Metal Blade in 83 and in 85 their debut album "Legions of the Dead" assaulted the most dedicated metalheads ears in North America, then spreading all over the globe, earning a solid fanbase in Europe. The Album was during two months in Kerrang Magazine Top 10 Import Albums and got rave reviews everywhere. Their sound could be compared with other labels successful acts such as Trouble and Omen but in a league of their own, Tyrant cemented their own style (image included) which some like to call "Apocalyptic Metal".

For a long time that this album was not released on CD in Europe, so Blood & Iron decided to work directly with founder and Bass Player Greg May to deliver an expanded 30th year anniversary edition with rare bonus tracks taken from their first rehearsal demo recorded on the 3rd October, 1982. This demo has 7 tracks and it was transferred only very recently, from 2" Reel Tape, directly to digital to be featured for the first time as an anniversary present from the band and the label to the fans.

The graphic content also was carefully put together through 24 pages, with many rare photos, memorabilia pics and an extensive biography written by Greg himself with all the information that fans want to know.

Looming over Vancouver, BC is an invisible dark energy, trapped in shadow, that imbues the region's Death Metal, with a most turbulent methodology. Blasting outside time and out of mind, reaching deep into the lowest places of the Earth, the inhuman entity called Auroch encapsulates the distant thousand eyed doom of the cosmos, long hidden, frozen to the core and ripe to be awakened once more.

From Forgotten Worlds assails throughout its duration, summoning incongruous black symmetry, with onerous Dark Death Metal chaos that extends a direct blood lineage began by Morbid Angel, Gorguts, Timeghoul, Kataklysm, Cryptopsy and other reapers of the whirlwind. Rites

such as Pathogenic Talisman (For Total Temporal Collapse), Fleshless Ascension (Paths Of Dawn) and the opening title hymn rip across the skies rending flesh from sickly bones of the fallen.

Retroactive Records 2017 - Limited Edition with spine, white record sleeve, color insert (with band pic and lyrics) - 300 x Black Vinyl
Fire & Love should come packaged with a rubber mat to prevent your jaw from shattering when it drops to the floor. Response to the album release (1990) was overwhelming, and the video for the song "Power of Love" was included in the MTV's Headbangers Ball rotation. The shredding melodic metal of their previous album is replaced by red-hot, fired-up commercial hard rock that is belted out with emotive power to spare by the awesome Jamie Rowe.

Adding to the album's appeal is the legendary production talents of John & Dino Elefante (Kansas/Mastedon)! If you love big guitars (Palacios rips!), big hooks (Motley Crue would be jealous), big choruses (Bon Jovi would approve), big vocals (can you say wall of sound?), and big production (it's the Elefantes...what else do you need to know?), then you'll love this album, a true Christian hard rock classic.

Fire & Love earned Guardian a well deserved place at the top of the Christian hard rock/hair metal scene, nudging Stryper slightly over to share a bit of the spotlight. At #28 on Top 100 Christian Metal Albums of All Time (2010, HM Magazine), #61 Top 100 Christian Rock Albums of All Time (2010, HM Magazine), #18 on the Christian Metal Realm's 100 Greatest Christian Metal Albums of all time, and #11 Top Albums of the 90's by Angelic Warlord Reviews, Fire & Love offers elite Christian metal that still knows how to win the hearts, and touch the lives of fans across the world! Fire & Love has been digitally remastered for this 2017 reissue, further enhancing the pure magic that has been thrilling fans since its release in 1990!

Excerpts is simultaneously warm in its production yet cool in execution, swaggering through its 43-minute duration with Uriah Heep's jauntiness and lively playfulness. Simple guitar and keyboard leads dominate proceedings, occasionally layering in Maiden-esque harmonies, and entirely avoiding an overt reliance on Black Sabbath unlike so many throwback rock and metal bands.

Retroactive Records 2017 - US Direct Import - Limited to just 200 Copies in Black Vinyl, don't wait to snag your copy! Remastered by Rob Colwell of Bombworks Sound, you know your ears are in for some elite metallic ear candy!

This 2017 Retroactive Records reissue see this classic progressive metal album on vinyl for the very first time!

Your Dying Day, is a stellar brand of progressive power metal with subtle thrash influences that provided musical and spiritual depth in the face of cultural shallowness. It was the perfect album, released at just the right time.

For fans of Deliverance, Recon, Sacred Warrior, and Queensryche!

Haven was a Christian Heavy Metal band from the United States that released Your Dying Day on the legendary R.E.X. Records in 1990. The album was, and still is, an example of a Christian band getting it right in terms of releasing music that stood apart from other heavy metal bands through their artful progressive bent. This debut release showed its impact immediately by transcending the metal label, while sealing the band's reputation for cerebral compositions. The 80's metal scene celebrated excessive use of drugs and alcohol, and that influence resulted in alienation and hardship. Those hardships would open the gateway to Grunge and Alternative - but in 1990 we weren't there just yet!

Queensryche set the bar for metal that moved beyond cliché with 1988's Operation Mindcrime. Your Dying Day, is a stellar brand of progressive power metal with subtle thrash influences that provided musical and spiritual depth in the face of cultural shallowness. It was the perfect album, released at just the right time.

HAVEN - Age of Darkness (NEW*LIM.200 BLACK V.*US WHITE METAL*CRIMSON GLORY*POWERSURGE) - 30 €

Retroactive Records 2017 - US Direct Import - The 2017 reissue of Age of Darkness on Retroactive Records sees this classic album on vinyl for the very first time!

Limited Edition of only 200 copies in Black Vinyl. Get them while they last! Vinyl has been digitally remastered to perfection by Rob Colwell of Bombworks Sound!

For Fans of Queensryche, Fifth Angel, Apocrypha, Powersurge, Crimson Glory and Metal Church.

1991's Age of Darkness is the second (and final) album from Christian metallers Haven. Before you conjure up images of Stryper, you'd do well to give this one a chance. Where a band like Barren Cross drew its influences from Dio and Iron Maiden, Haven's sound owes more to a certain Seattle sound like Queensryche, Fifth Angel, and Metal Church.

Age of Darkness is a very impressive traditional/power metal album, full of great melodies, shredding guitars, and a Geoff Tate-inspired vocal style. There are a couple instances of Dokken-style balladeering, but for the most part this is a fast paced power metal album that should please fans of Apocrypha, Powersurge, Crimson Glory, and any of the bands mentioned earlier. Haven is a Christian band, but they're not overly "churchy" with their lyrics, so Age of Darkness shouldn't alienate the average metal fan. Believe me; this one's much more likely to induce headbanging than Bible-thumping!

HOLY SOLDIER - Last Train (NEW*LIM.150 RED VINYL*US WHITE METAL CLASSIC*QUEENSRYCHE) - 30 €

Roxx Production 2017 - Brandnew US Direct Import ! This limited edition pressing with 150 on red vinyl only - for the very first time this album has ever been pressed on vinyl!

For Fans of Barren Cross, Stryper, Dokken, Sacred Warrior, Queensryche

Formed by bassist Andy Robbins and guitarist Jamie Cramer, Holy Soldier burst on to the scene in 1985 taking the Christian rock world by storm. The band played all over the US but very quickly built a large following in their home state of California. At one time the band held the largest attendance records at the famous Hollywood night club Gazzarri's. By 1990 the band would release their debut self-titled album which would draw even more attention and success to the band allowing them to continue to tour and record. By 1992 the band would release their highly anticipated sophomore effort titled 'Last Train' which would even further their success and broaden their market reach across the world. The band would play live relentlessly, touring all over, winning two Dove awards and building an amazing following all over the world. " 'Last Train' shows a band at the peak of their prowess. With grit and determination Holy Soldier shows that they were not followers in a narrow glam scene but were an exceptional hard rock act that worked hard to create a unique sound that deserved more recognition than they received. All the years of slugging it out in the L.A. club scene were not lost on this talented five piece, producer David Zaffiro pulled out the best they had and helped to craft an under rated gem." Keven Crothers (White Throne / Heaven's Metal)

This year marks the 25th anniversary of that sophomore release 'Last Train' and with that we are going to celebrate and give this classic release a much needed reissue giving it that special Roxx treatment. The music on this reissue will be exactly as it originally appeared in 1992 track by track, but featuring a complete and new remaster done by J Powell at Steinhaus Remastering, and it sounds amazing! In addition this reissue will feature some slightly updated artwork, however keeping the integrity, look and feel of that classic original pressing. This brand new interpretation of the artwork as well as the full layout and design was done by Scott Waters (Roxx Records / No Life Til Metal).

Ice Age hail from Gothenburg, Sweden and came into being in early 1985. Meeting through a music store advertisement, Sabrina Kihlstrand and Pia Nyström formed Ice Age. With the roster rounded out by Helena Kihlstrand (Sabrina's sister) and Tina Strömberg, Ice Age were more power metal oriented in the early stages. Originally named Rock Solid, they changed to Ice Age after the first demo. As the Ice Age sound became rawer, they moved into playing very technical thrash. Touring several countries and playing many festivals, these Swedish ladies gradually gained more and more popularity. By 1990 Ice Age had recorded four demos. Rock Solid (1986), General Alert (1987), Untitled (1988), and Instant Justice (1989).

IRON GRIFFIN - Same (NEW*FIN HEAVY METAL*LIM.350 BLACK V.*M.FATE*OMEN*WARLORD*B.HELM) - 17 €

Gates Of Hell Records 2017 - Limited Edition of 350 copies in Black Vinyl ! Classic Heavy Metal from Finland (Mausoleum Gate Member) here in the vein of Mercyful Fate, Warlord, Brocas Helm, Omen, Dark Quarterer and Stormwitch. The success of Finnish retro rockers Mausoleum Gate has only heightened the creative spirit of its drummer, Oskari Räsänen. Whereas Mausoleum Gate takes its cues from proto-metal and '70s rock, Iron Griffin tackles vintage metal with full aplomb. Backed by the soaring, falsetto-driven vocals of Toni Pentikäinen, the five songs (including one brief intro) that make up the band's self-titled EP combine "Melissa"-era Mercyful Fate with the marauding melodic sensibility of NWOBHM. And as expected, the production here is crisp and warm, devoid of any sort of "modern" shades and hues, allowing for Räsänen's smart, compact arrangements to shine. A total classic heavy metal package, Iron Griffin's self-titled EP is on-the-money for those who appreciate true song-craft, top-notch melodies and the sensation of dropping the needle on the vinyl record of your favorite metal band.

The second, 'Värimyrsky', is also an older and more nihilistic one, that we have been playing with for a long time, and now finally decided to record it in our home cave with the help from our Brother-in-Wastement Jussi Saarivuori." A must have for all Fans of Orchid, old Black Sabbath with Ozzy, Witchcraft, Saint Vitus, Witchfinder General and Count Raven

With their sophomore album Celestial Cemetery out on Church Within Records, Norwegian Purple Hill Witch hits a sweet spot in the metal triangle between Angel Witch, Black Sabbath and Hawkwind. It's that alchemistic moment where psych, doom, NWOBH, proto metal and rock

is molded and sculpted into a perfect entity. Whereas their debut album had more of a stoner rock vibe to it, the new album takes the listener on a sheer proto doom journey past vast galaxies of swirling, lommic riffs, blistering soli, driving drums and a steady surge of pulsating bass. What really strikes through on Celestial Cemetery is how much atmosphere and true feeling the band manages to cramp into the furrows of their sonic landscape - this album oozes with hallucinogenic visions of occult rituals and barren medieval country sides haunted by wicked witches. As such it leaves an even darker, more sinister imprint, and if there ever was an immaculate soundtrack for when going witch hunting across celestial cemeteries this would have to be it. Grab the magic wand and a copy of Purple Hill Witch's new album before the next hunt, you will need it.

Gates Of Hell Records 2017 - Brandnew 2nd Album - Limited Edition of 350 copies in Black Vinyl + Insert !

For Fans of Iron Maiden, Mercyful Fate, Dark Forest, Satan's Fall, Angel Sword Too often, classic or traditional metal bands get caught in the vacuum of relying too much on the past. Not Tyfon's Doom sole member, Tommi Varsala. Varsala's innate ability to create classic, but timely metal rung true throughout "Yeth Hound", but it's even more prominent on the band's first full-length, "Emperor's Path". The album's 11 songs brim with confidence, not to forget a production job that puts "Yeth Hound" to shame. It's classic metal for the modern age. Recorded from autumn 2016 to February 2017 primarily in Tampere, Finland in Varsala's own rehearsal studio, "Emperor's Path" marks the first Tyfon's Doom release to feature drummer Cederick Forsberg (Blazon Stone, Rocka Rollas, Cloven Altar) who laid down his parts at Studio 2-takt in Sweden. This allowed Varsala to focus on what he does best, namely, melodic, surging numbers, stocked with flighty twin-guitar harmonies and his throaty rasp, best described as the denim-wearing cross between MOTÖRHEAD legend Lemmy Kilmister and Destruction's Schmier. While songs like album opener "Tyrant's Sceptre" and "Beyond Treason" are molten slabs of pure metal, the brilliant stacked melodies that kick off "The Hidden Hand" and ride throughout "Moonlight" showcase an outfit capable of combining the never-say-die melodies of NWOBHM with the bright melodicism of the band's Finnish homeland.

ORNE - The Tree of Life (NEW*LIM.200 BLUE VINYL*DOOM/PROG/70ies ROCK*REVEREND BIZARRE) - 18 €

Svart Records 2017 - This was maybe the best 70ies/Prog/Doom Rock Album of the year 2011 - now as high quality reissue, limited to 200 on blue vinyl.

Orne's second album appeared in 2011 and was available on vinyl only for a fleeting moment.

Orne were Reverend Bizarre's alter ego in a sense, as they were the guitarist Peter Vicar/Kimi Kärki's vehicle for his progressive rock oriented compositions. Joined by vocalist Albert Witchfinder, drummer Earl of Void plus Pekka Pitkälä on guitar, Timo Oksanen on flute and Pirkka Leino on keyboards, Orne are a brilliant conjoining of early 70's prog rock sensibilities with a certain esoteric qualities familiar from its members' other projects already.

9 of 10 Points in the new Rock Hard Magazine !

Fantastic US Epic Doom Metal - This is a must have for all While Heaven Wept supporters who wish the back the days of "Sorrow of the Angels" or "Of Empires forlorn" ! Sorrow and Extinction is a majestic release, and one of the finest doom albums I've heard lately. Brilliant and melancholic guitar melodies that spring to mind acts such as Warning and WHW. The bass is fucking massive here, which really adds to the doom factor, humming from the speakers and shaking the earth, the riffs are pretty heavy to begin with, featuring an awesome tone but damn, coupled with the bass; absolute anvil dropping magic. The vocals themselves are well done, emotional and powerful!

For Fans of old While Heaven Wept, Warning, Solstice, Count Raven, Saint Vitus, Trouble

Pagan Altar are one of the originators of doomy NWOBHM, mixing their 70's influences into occult-tinged heavy metal. Alongside bands like Witchfinder General and Legend, their very own unique breed of mystical doom metal was unfortunately sunk into obscurity after no interest were shown from labels. Despite that, the timelessness of their music ultimately prevailed as doom-obsessed fanatics kept Pagan Altar's music alive over two and a half decades by trading their self-titled demo cassette and even bootlegging it.
